

# DRAGON'S KEEP™

**B**y selecting Dragon's Keep™, you are providing your child with a quality learning experience. No help or supervision on your part is needed if your child can read at second grade level. The vocabulary is controlled, the instructions are on the disk, and no typing skills are required. The entire game is played with the space bar and return key.

In the game, a magical dragon is holding 16 animals captive in and around its magic house. The player must find each animal and set it free. Sometimes the dragon appears and won't let an animal go. The player must then leave the scene and return later when the dragon has gone.

Dragon's Keep is designed to help your child develop reading comprehension skills. These skills include identifying details, making inferences and drawing conclusions.

The process of recalling stated facts, or *identifying details*, involves having your child pay attention to important details, remembering them, and relating them to the larger ideas of the author. Places where the animals are hidden would fall into this category.

*Making inferences* is the ability to see implied ideas for which there is substantiating evidence and acting upon those ideas. When your child ascertains that the puppy has been tied up by the dragon and is not just waiting for its master, your child is demonstrating the ability to make inferences.

To *draw conclusions* your child must understand the relationship between the details and identify the central idea of the story. When your child understands the concept of looking for the animals, he or she is drawing conclusions about his or her role in the game.

Map reading is a very difficult skill for young children to master. To give your child a head start, we have enclosed a large map with labeled areas. Each time an animal is set free, your child can mark the location with a peel-off sticker.

Encourage your child to use the map and animal stickers as an aid to remembering where he or she has been in the game. In this way *map reading*, *directionality*, and *note taking* skills are increased.

# APPLE LOADING INSTRUCTIONS

PROGRAM AND GRAPHICS BY  
AL LOWE, MARGARET LOWE  
MICHAEL MacCHESNEY AND RAE LYNN MacCHESNEY

GRAPHICS ROUTINES FROM PENGUIN SOFTWARE'S
